

COVID-19
PREVENTION
IS IN OUR HANDS

As COVID-19 remains with us, there are prevention measures that are within our control

WE DO

have an opportunity to contribute to population immunity by receiving the vaccine when it becomes available

BECAUSE

the more people who are vaccinated, the harder it is for the virus to circulate

▶▶▶▶ **GUIDELINES** ◀◀◀◀

Population, or herd immunity protects those who cannot be vaccinated or are not yet vaccinated because many of those the virus comes into contact with are already immune and cannot spread it

Even after being vaccinated, people are encouraged to keep up the good behaviours that keep themselves and others safe, including social distancing, wearing masks, sanitising and avoiding crowded places
